Furnishing Knowledge®

COMPACT. MOBILE. VERSATILE.

Versatile CaféWay tables adapt to cafeteria needs and help create inviting spaces for everyone. CaféWay delivers safe, easy operation and mobility. They are easy to move and fold compactly for high-density storage and efficient shipping. CaféWay tables are available in a variety of sizes and shapes: rectangular, round, racetrack, and octagonal with bench and stool seating options.

RECTANGULAR TABLES WITH BENCHES

A Safety latch automatically locks the table in the down position.

B Self-adjusting support legs are spring loaded to ensure contact with uneven floors and to keep the table from rolling away while the table is in the down position.

C Outrigger casters enable the table to fold flat and nest, minimizing table storage footprint while still exceeding UL tip-over requirements.

D Tabletops extend past the outrigger casters to accommodate end-to-end table layouts without caster interference.

SAFE. SECURE. DURABLE.

Built to withstand the rigors of school cafeterias, CaféWay provides superior durability through the use of quality materials and its unique support structure. Compression or torsion springs and torsion bars assist table lifting, making operation smooth, easy and safe. Stool support bars allow safe and easy ingress and egress from the tables.

RECTANGULAR TABLES WITH STOOLS

RACETRACK TABLES WITH STOOLS

OCTAGONAL TABLES WITH STOOLS

ROUND TABLES WITH STOOLS

Center support legs assist with weight load distribution to limit stress on hinge points (rectangular tables with stools only).

A third castor (at table ends) adds support by distributing weight across more surfaces (shaped tables only).

Stool support bars run perpendicular to the table above the floor, eliminating trip hazards.

Recyclable polypropylene stools have reinforced ribs at stress points for greater durability.
