

The Wharton Lectern. It speaks for itself.

- Technically advanced
- User friendly
- Cutting edge aesthetics

■ **Putting dynamic presentations at your fingertips.**

Expanding plexi-glass top

The frosted plexi-glass top slides forward to reveal the control console. A built-in tray is available to hold a mouse. The control console houses power and data ports for a laptop.

Pull-out keyboard tray

The optional keyboard tray slides into the lectern when not in use. Out of the way. Neatly concealed. A black, snap-in cover encloses the opening when a keyboard is not installed.

Handy drink caddies

A refreshing sip stays within easy reach on swing-out drink caddies to both left and right. When not in use the caddies store out of the way.

Clear vision and audible speech

For clear, unobstructed views. The speaker and microphone are adjustable to the user's point of view.

Access power and data for a speaker's personal computer from within the flip-open technology well. The well has ample room to neatly store cords, and transformers.

More power. Two additional power outlets accommodate other presentation equipment.

Ready. Set. Go. Just plug the six-foot grounded plug into a wall or floor outlet and the lectern is immediately powered.

The Wharton™ Lectern

The ultimate in advanced presentation technology. KI teamed with instructors from the prestigious Wharton School of Business to develop this state-of-the-art lectern that features complete control and comfort.

An optional touchscreen monitor (available from Crestron, Inc. - www.crestron.com) controls presentation technology and the complete room environment (lighting, sound, temp). Or, if preferred, a laptop can be stored within the optional storage tray.

Flexibility is the key. Adjustable note light and microphone. Swing-out drink caddies. Even an optional keyboard tray with right/left-handed mouse pad.

It rises to the occasion. The speaker can electronically adjust lectern height from 37 1/2" to 47", accommodating the 5th percentile female to the 95th percentile male.
