# Cooper House

## Interiors Scope

In 2015, Camden County purchased the former Hadley House/Lobster Trap on the Cooper River. With visions of creating an alfresco, farm-to-table restaurant, Bellia and R2A went to work on \$2.3 million renovations to the building. Being that the Cooper House will be the Welcome Center for Cooper River Park, it was important to carefully plan the layout and design to reflect the area's goals of attracting more outdoor enthusiasts and families to the waterway. Bellia assisted in the overall design and selection of the dining room, bar, and outdoor furniture creating a trendy, comfortable space. In keeping with the Cooper House's vision, the furniture was carefully chosen to bring the outside in, replicating the natural setting of the park and river while functioning as a casual gastro-pub. With a modern design and a comfortable feel, the Cooper House is an inviting space to enjoy the views of the Cooper River and its surrounding park.

## About Cooper House

Sitting on the Cooper family parcels of land, the Cooper House restaurant has a rich history. Originally, the Hadley House, a Works Progress Administration building built in the mid-1930s, it also served as a tennis clubhouse, bike rental facility, and seafood restaurant named the Lobster Trap which closed in the summer of 2013. Now owned by Camden County, New Jersey, the Cooper House will be the Welcome Center for the 374-acre Cooper River Park and will offer an affordable American menu paired with local beers and wines.
